### Restore Harrow Green win Partners in Relocation award

Last night Restore Harrow Green were honoured with the Partners in Relocation award for their long standing business relationship with Jaguar Landrover at the PFM Awards. The annual ceremony is organised by PFM Magazine and celebrates the best performers in the Facilities Management Industry.

Winners of the awards have been independently assessed by their peers to have provided the highest level of service through the successful application of collaborative processes. The accreditation reinforces relationships with partners and clients in all areas of business, encouraging future relationship growth. Winners can celebrate having achieved one of the highest accolades in the FM industry and take pride in the quality of their service.

Restore Harrow Green began their partnership with Jaguar Land Rover in 1999 and are now their only relocation supplier, supporting the business across JLR's various UK sites. The partnership involves moves, changes, furniture storage and management, legacy asset clearance including WEEE, post-move cleaning, IT relocation and heavy lifts works. The team moves between 6,000 and 10,000 people a year as well as complex items, mission critical to the JLR business.

Restore Harrow Green have won the Partners in Relocation award a total of six times. Liz Russell Head of Relocation Services in the Midlands said: *"Our partnership with JLR has been built on trust and integrity. Receiving this award is testament to the fantastic work our team in Birmingham deliver. It has been an incredible journey to be part of the changes during the last 20 years of this iconic brand and we look forward to continuing to support the JLR workplace and property teams."*

### About Restore Harrow Green

Restore Harrow Green is an award winning, market leader in office and commercial relocations, operating from multiple sites across mainland Britain serving all types of organisations in the private and public sectors.

As well as business moving, other services include: technology relocations, IT lifecycle solutions, managed storage, project management, international moves, furniture re-use and recycling.

As part of Restore PLC, records management, secure data shredding and document scanning are additional services that can be provided under one roof.
